

Highly Intuitive Kids

ELLEN EDMONDSON

Highly Intuitive Kids are more common than most people think--15-20% of the population possess this trait. This is a fact to keep in mind when accessing kids with unique behaviors. They may come under the category of highly intuitive and empathic.

Our vision and mission at Highly Intuitive Kids are to:

- Raise awareness and provide support to highly intuitive kids between the ages of 2-17, their parents, and caregivers everywhere
- Provide parents, caregivers, educators, counselors, and others with information, resources, and a community to support highly intuitive children.

We offer support, resources, and community for parents, caregivers, educators, and other professionals to help support the needs of the highly intuitive child.

What others are saying:

The work you're doing, the website, the support group - it's so important and so deeply needed.

--Rebecca Kramer Fiscal M.Ed., Author of Let Them Move

I wish there was a useful source, like yours, available when I was a child so maybe I would not need to go through so much pain and sorrow for being "the strange one."

--Naj from England
